PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years building scalable web and mobile applications across fintech, enterprise SaaS and education platforms. Full-cycle delivery, from architecture and frontend through backend API design and mobile apps. Strong focus on clean architecture, role-based security and reusable component design. Experienced in agile teams, CI/CD pipelines and AI-assisted development.

WORK EXPERIENCE

Full Stack Developer, Confidential client

Jan 2026 – Present · Remote

- Built a B2B fintech dashboard from zero in Next.js 15 (corporate cards, SPEI transfers, commissions, reporting) and worked on its React Native (Expo) app for real-time movements and transfers.
- Secured it with JWT in HttpOnly cookies, middleware route guards, silent session renewal and role-based access control.
- Contributed to the NestJS backend (Clean Architecture / DDD): refresh-token auth, user and role management, Dock gateway integration, OTP and TOTP 2FA, webhooks, PDF reports.
- Shipped the full frontend of a commissions platform in Next.js 16 and React 19 — admin, client, beneficiary, movement and schema modules on Zustand.
- Built the card subscription and tokenization flow for recurring charges across two products, and a compliance platform with separate portals for the internal team and the client.
- Covered that backend with Jest unit tests across use cases, services, repositories and auth guards.

Full Stack Developer, The Rocket Code

Aug 2023 – Jan 2026 · Remote

- Built and maintained Next.js dashboards for corporate credit card platforms: user management, transaction history, card controls.
- Integrated the complete transaction flow against Dock APIs and SPEI.
- Raised Lighthouse performance by over 60% by fixing LCP and CLS.
- Set up CI/CD on Bitbucket Pipelines for automated deploys.
- Refactored frontend codebases toward reusable components and better accessibility.

Software Engineer, Peña Colorada

Jan 2023 – Jun 2023 · Colima, Mexico

- Built an internal IT service request system with automated approval workflows.
- Designed the backend API on Express.js and MS SQL Server.
- Gathered and validated requirements directly with non-technical stakeholders.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Vue.js, React Native, Expo, Zustand, Redux, React Hook Form, Zod, Tailwind CSS, shadcn/ui, Material UI, CSS Modules, Styled Components, Recharts, jsPDF, ExcelJS
Backend and APIs	Node.js, NestJS, Express.js, REST, GraphQL, JWT, Swagger, class-validator, Passport, Argon2, Bull, Cron, Rate limiting, Prisma, TypeORM, PDFKit, PHP, Python
Payments	Conekta, Dock, SPEI, OTP / TOTP 2FA
Data	PostgreSQL, MongoDB, MySQL, MS SQL Server, Redis
Delivery and testing	Git, Docker, GitHub Actions, Bitbucket Pipelines, Jest
Everything else	AWS S3, Google Tag Manager, GitHub Copilot, Claude Code

EDUCATION AND LANGUAGES

Education	B.Eng. Software Engineering, University of Colima, 2019 — 2023. Professional License (SEP).
Languages	Spanish (native), English (working)
